

## Floods, Floodplains & California Water Workshop

The California Department of Water Resources, Grasslands Environmental Education Center, California Department of Fish & Wildlife, and California Project WET invite K-12 educators to a flood-focused Project WET workshop.

Join us to learn about the benefits that floodplains provide for wildlife, agriculture, and local communities. Hear from scientists about area projects designed to reconnect floodplain habitat along the San Joaquin River to improve habitat for migrating waterfowl along the Pacific Flyway, passage for migrating salmon, stormwater capture, groundwater recharge and flood protection in a changing climate.

For a \$20 registration fee, participants in this workshop will receive an overview of the Central Valley flood protection system and the benefits of healthy floodplain ecosystems from flood management experts and training on the use of Project WET activities to engage your students in the study of flood science concepts.

Participants will also receive a copy of Project WET's new 'Foundations of Water Literacy' guide, a light breakfast and lunch, an introduction to the education programs offered by Grasslands Environmental Education Center, an opportunity to receive CEU credit - and a \$100 stipend provided following completion of the training!

**Saturday, April 27, 2024 (9:00 am to 3:00 pm)**  
**Grasslands Environmental Education Center**  
**18110 Henry Miller Road, Los Banos, CA 93635**

To reserve your spot, please [click here](#) or contact Brian Brown, California Project WET Coordinator at [projectwet@watereducation.org](mailto:projectwet@watereducation.org) or (916) 444-6240 if you have questions.

**REGISTRATION WILL CLOSE FRIDAY, APRIL 19, 2024!**
